

# Cruise Booking Technology

**Made in Germany**

---

## Cruise IT Booking Solutions for cruise providers

GoVios offers the full chain of the cruise booking process depending on your business purposes – even as a full service solution:

- ✓ Data of 10.000+ cruise itineraries (*incl. prices, live availabilities of all cabins, included and excluded services, port details and much else*)
- ✓ REST API (*JSON based*)
- ✓ Flat Files (*for importing data via XML, even for single operators*)
- ✓ Unique and public content (*such as images, videos, itinerary information, operator-, ship- and highlight descriptions, ports information, region descriptions, travelogues and much more*)
- ✓ Booking executions (*both booking requests and direct bookings*)
- ✓ Webdesign (*see live example on the bottom of this page*)
- ✓ White Label Solution (*as shown in example, but using your own branding*)
- ✓ CRM for all customer relations (*leads, offers, requests, bookings, marketing channels, history*)
- ✓ Cruise experts (*for consulting an support*)

---

## All major operators for the German cruise market

AIDA Cruises

Azamara Club Cruises

Celebrity Cruises

Costa Kreuzfahrten

Cunard Line

Hapag-Lloyd Cruises

MSC Kreuzfahrten

Norwegian Cruise Line

Royal Caribbean International

TUI Cruises

→ We continuously add further operators to our data base.

---

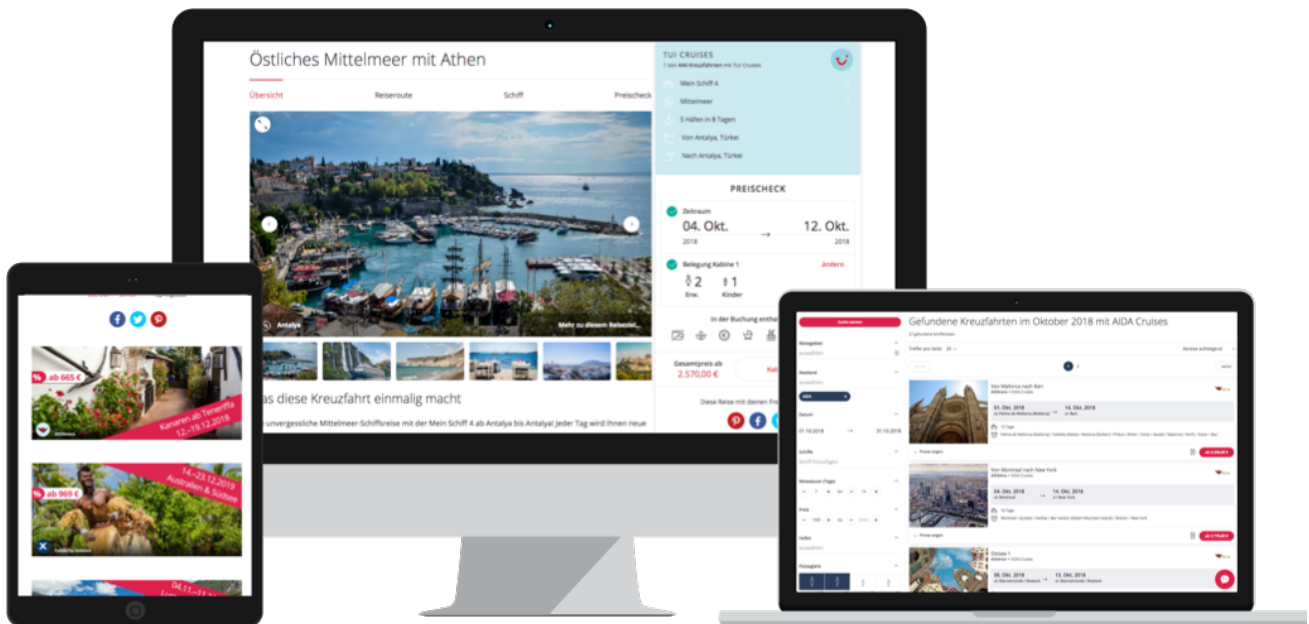

## Fast and flexible Cruise Booking Engine

Our booking technology is extremely fast and provides a great booking experience. Just to name a few features:

- ✓ Real API with real-time two way communication (*no iFrame!*)
- ✓ Advanced filtering (*by operator, region, ship, port, holidays and much more*)
- ✓ Booking requests (*leading to yourself or our cruise experts*)
- ✓ Direct bookings up to the cabin (*for some operators*)
- ✓ Cruise Reservation Software included (*full CRM*)
- ✓ Provide a great booking experience on your site

---

## Run your booking site for cruises by using our data, content and booking executions

All content such as images, videos, text, prices, availabilities, included services, search results and much more is provided by our GoVios backend. No iFrame but fully integrated API calls. Using this, Online Travel Agencies (OTAs) and other Online Cruise Sites are able to extend and improve their business by offering cruises from all relevant operators for the German cruise market.

---

## Experience and test our solution live

For demonstration purposes see our showcase website [gocruise.com](http://gocruise.com) and discover what is possible with our cruise booking technology. Even that site as well as similar sites as a white label solution are part of our portfolio.

## Free trial and contact

If you are convinced by the possibilities of our cruise booking technology ask for a 30 days period of a free trial and check our API via swagger.

We don't just talk about what we offer, but even prove everything by giving you a great live experience of what we can provide!

For a free trial or more details please contact us!
